This section was not scored because either additional (optional) items were not used or no additional items were answered.
1. What aspects of the course or the instructor's approach contributed most to your learning?

The fact he believed every student is capable of achieving success in class. He never promoted an atmosphere of unity among classmates or opposed unlike
the having classmate compete against one another.

He also addressed the gaps in our fundamentals in our math background. Most teachers don't acknowledge students with problems like and continue to teach the class that eventually fails because of it.

2. What aspects of the course or the instructor's approach would you change to improve the learning that takes place in the course?

I wouldn't change anything. He is one of the greatest professors that of I have had at Temple University. It is a shame he doesn't have tenure here.

3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

He has been very professional since the beginning through until the end.
1. What aspects of the course or the instructor's approach contributed most to your learning?

Prof. H. S. Vinbhodra is the best instructor I have had at Temple University so far. He is always available to answer questions in his office or through email. He replies to emails very quickly. He helped review for tests and genuinely wants students to succeed in this course and in all future math courses. He should continue to teach at Temple U. for many years.

2. What aspects of the course or the instructor's approach would you change to improve the learning that takes place in the course?

None. Prof. H. S. Vinbhodra made this course very enjoyable.

3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

The instructor did not target or single out any students based on diversity.

The instructor took a lot of time to prepare very helpful study packets and to answer any questions. He made sure everyone understood the material and gave assignments that weren't a complete overload of work but perfect for understanding & practicing the material. I hope to have him as an instructor for my future calc. courses.

Allow more than 2% of the overall grade for homework.

3. Please comment on the instructor's sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

Also, he made up stories for us to remember how to work out problems. He really worked to get our whole class up to speed & masters at pre-calc. I can't wait to hopefully have him next fall for calc 2.
