1. What aspects of the course or the instructor’s approach contributed most to your learning?

He really motivated us to well in the course.
I would receive e-mails from him encouraging me to well on the exams and he would inquire if I had any trouble or questions on the material that we were learning.
He seems to really care about his students’ performance, and pushes us to do well. He also provides us with homework packets and review sessions.

2. What aspects of the course or the instructor’s approach would you change to improve the learning that takes place in the course?

I think he is a terrific professor, but does come off strong sometimes (perhaps that is only because he wants his students to be successful).

3. Please comment on the instructor’s sensitivity to the diversity (for example, political viewpoint, race, ethnicity, national origin, gender, sexual identity and disability) of the students in the class.

I found him to be sensitive to the diversity in the class - he keeps everyone engaged in his lectures.

Many aspects of Dr. Vishal's approach helped me. He taught us to be careful in making mistakes, prepare very well, think about study packets for tests, give office hours, and more office hours during the weekend. All of this helped me become a D student in math to a B.
