Information about the Final Exam

Where and when:
The time and location of the exam will always be posted

http://www.drexel.edu/registrar/exams/

As of today December 1’st, it is scheduled for December 11’th at 3:30 in the huge auditorium in the Main Building. However this could change at anytime, so be sure to check later.

Calculators:
No calculators, cell phones, or other electronic devices are permitted.

Formulas:
The next page contains a list of formulae and useful facts. This page will be included with the exam. If you have questions about the formula page, ask them before the exam.

Weighting:
The exam is comprehensive, but there is an overweighting of material that we covered after the midterm. A rough guide to the relative weighting of topics is:

• Exponentials and logs: 3 of 15.
• Analytic Geometry: 3 of 15 questions
• Trigonometry: 4 of 15 questions

Preparation Hints:
About half of the exam will be problems that you have already done. Specifically:

• Two questions will be taken, almost verbatim, from quiz problems in the book.
• Two questions will be taken, almost, verbatim, from practice and example problems in the book.
• Two problems will be taken, almost verbatim, from the “Final Exam Problems” at the end of the book.
• At least two problems will be taken, almost verbatim, from the Final Exam Review Problems that are distributed in the last week of class.
